ABA Definition of the Month

Mastery Criteria: Criteria set by a supervisor (BCBA/Case Manager) during initial behavior/skill assessments to determine the objective and measurable goal for when a client has achieved a specific skill.

Example: "Achieving 80% proficiency across three consecutive sessions involving two individuals and two different settings, by June 2024."

Friendly Reminder!

Online data collection through Catalyst is now live! Please be sure to reach out to your supervisor if you have any questions.

Please remember to observe professional email/text etiquette when responding to your supervisor or to the scheduling team. Please respond in a timely manner, ideally within a few hours, and ensure that your messages maintain a tone of respect and professionalism. It's important to acknowledge that your supervisors and the scheduling team are colleagues and professionals dedicated to facilitating progress for our clients and their teams.

Thank you so much!
